

Technical Manual  
No. 5-698-2

HEADQUARTERS  
DEPARTMENT OF THE ARMY  
Washington, DC, 3 May 2003

APPROVED FOR PUBLIC RELEASE: DISTRIBUTION IS UNLIMITED

# RELIABILITY-CENTERED MAINTENANCE (RCM) FOR COMMAND, CONTROL, COMMUNICATIONS, COMPUTER, INTELLIGENCE, SURVEILLANCE, AND RECONNAISSANCE (C4ISR) FACILITIES

## CONTENTS

	<i>Paragraph</i>	<i>Page</i>
CHAPTER 1. INTRODUCTION TO RELIABILITY-CENTERED MAINTENANCE		
Purpose .....	1-1	1-1
Scope .....	1-2	1-1
References .....	1-3	1-1
Availability, maintenance, and reliability .....	1-4	1-1
The reliability-centered maintenance (RCM) concept .....	1-5	1-3
Benefits of RCM .....	1-6	1-3
Origins of RCM .....	1-7	1-4
Relationship of RCM to other disciplines .....	1-8	1-5
CHAPTER 2. ESSENTIAL ELEMENTS OF A SUCCESSFUL RCM PROGRAM		
RCM implementation plan .....	2-1	2-1
Data collection requirements .....	2-2	2-2
Data analysis .....	2-3	2-3
Commitment to life cycle support of the program .....	2-4	2-3
RCM as a part of design .....	2-5	2-3
Focus on the four Ws .....	2-6	2-3
CHAPTER 3. MAINTENANCE OF SYSTEMS		
Introduction .....	3-1	3-1
Categories of maintenance .....	3-2	3-1
Categorization by when maintenance is performed .....	3-3	3-2
Maintenance concepts .....	3-4	3-4
Packaging a maintenance program .....	3-5	3-5
CHAPTER 4. FUNDAMENTAL CONCEPTS OF A RELIABILITY-CENTERED MAINTENANCE PROGRAM		
Objectives of RCM .....	4-1	4-1
Applicability of preventive maintenance .....	4-2	4-1
Failure .....	4-3	4-2
Reliability modeling and analysis .....	4-4	4-3
CHAPTER 5. THE RELIABILITY-CENTERED MAINTENANCE PROCESS		
Overview .....	5-1	5-1
C4ISR candidates for RCM analysis .....	5-2	5-1
RCM data sources .....	5-3	5-2
PM tasks under RCM .....	5-4	5-3
The RCM process .....	5-5	5-4
Specific considerations for implementing RCM for C4ISR facilities .....	5-6	5-24
Evaluation of alternatives .....	5-7	5-25

**CONTENTS**

	<i>Paragraph</i>	<i>Page</i>
<b>CHAPTER 6. CONTRACTING FOR MAINTENANCE</b>		
Introduction to maintenance contracting .....	6-1	6-1
Approach for C4ISR facilities .....	6-2	6-2
Measures of performance .....	6-3	6-2
Scope of the contract .....	6-4	6-3
Monitoring performance.....	6-5	6-3
Incentives.....	6-6	6-3
<b>APPENDIX A REFERENCES</b>		
<b>APPENDIX B STATISTICAL DISTRIBUTION USED IN RELIABILITY AND MAINTAINABILITY</b>		
Introduction to statistical distribution.....	B-1	B-1
The exponential distribution.....	B-2	B-1
The weibull distribution .....	B-3	B-2
The normal distribution .....	B-4	B-3
The lognormal distribution.....	B-5	B-4
<b>APPENDIX C AVAILABILITY AND OPERATIONAL READINESS</b>		
Availability.....	C-1	C-1
Operational readiness .....	C-2	C-4
<b>GLOSSARY</b>		

**LIST OF TABLES**

<i>Number</i>	<i>Title</i>	<i>Page</i>
1-1	Cost benefits of using RCM for developing PM program.....	1-4
2-1	Data sources for the RCM analysis .....	2-2
2-2	Non-destructive inspection (NDI) techniques, briefly.....	2-4
2-3	Examples of failure mechanisms and modes.....	2-4
2-4	Examples of failure effect categorization .....	2-6
3-1	Examples of tasks under two categories of preventive maintenance.....	3-3
4-1	Examples of effects of operational failures .....	4-3
4-2	Methods for modeling reliability.....	4-3
4-3	Key features of the GO method.....	4-5
5-1	Criteria for applying RCM to products.....	5-1
5-2	Types of mechanical systems typical for a C4ISR facility.....	5-1
5-3	Typical components comprising the C4ISR facility electrical system .....	5-2
5-4	Typical components for a SCADA system.....	5-2
5-5	General data sources for the RCM analysis.....	5-2
5-6	Potential sources of C4ISR maintainability data .....	5-3
5-7	Understanding and using different sources of data.....	5-3
5-8	NDI techniques.....	5-5
5-9	Information needed for RCM .....	5-7
5-10	Example of identified tasks .....	5-22
5-11	Packaging the tasks from table 5-4.....	5-22
5-12	Typical questions addressed by a reliability assessment .....	5-23
5-13	Steps in design trades .....	5-26
5-14	Typical costs considered in cost-benefit analysis .....	5-27
6-1	Examples of positive incentives .....	6-3

## CONTENTS

## LIST OF FIGURES

<i>Number</i>	<i>Title</i>	<i>Page</i>
2-1	The RCM process starts in the design phase and continues for the life of the system .....	2-1
2-2	Applicability of age limit depending on failure pattern.....	2-5
3-1	Major categories of maintenance by when performed .....	3-1
3-2	Typical approach to categorizing maintenance by where it is performed ..	3-2
3-3	An example of packaging PM tasks .....	3-6
3-4	Example of how PM cards can be used to document required PM tasks ...	3-7
4-1	Block diagram of a simple redundant system.....	4-2
4-2	Example of a reliability block diagram .....	4-3
4-3	Example of a fault tree (from RAC Fault Tree Analysis Application Guide) .....	4-4
4-4	Example of a single line diagram (from IEEE Gold Book Standard Network).....	4-5
5-1	Data elements from FMEA that are applicable to RCM analysis.....	5-8
5-2	RCM decision logic tree (adapted from MSG-3) .....	5-10
5-3	Evident failure – hazardous effects .....	5-13
5-4	Evident failure – operational effects.....	5-15
5-5	Evident failure – economic effects .....	5-17
5-6	Hidden failure – hazardous effects .....	5-19
5-7	Hidden failure – non-hazardous effects .....	5-21
